

## **LIGHT RAIL – The Real Facts**

**In 2020 when the light rail opens, it's going to be slower, less frequent, less capacity and less comfortable than buses are now:**

- All regular buses are to be abolished except express buses.
- People will need to break their journey at Kingsford and Randwick.
- This will add, on average 20 minutes to each trip.
- There are currently 100 buses per hour, compared to 7 light rail services, through Kingsford in the AM peak.
- This equates to 12000 people per hour by bus, compared to 3375 for Light Rail.
- Less comfort: For every 450 people, there will be 330 people standing with light rail compared to 225 standing on buses.
